Paper2Slides - Synthetic Demonstration

Retrieval-assisted question answering

DEMO DOCUMENT - NOT A REAL RESEARCH PAPER

Abstract

This synthetic document demonstrates PDF reading, source tracing,
figure cropping and editable presentation export.

1 Introduction

Long documents contain information that may not answer a specific question.
A retrieval step selects relevant passages before composing an answer.

2 Method

Split the document into passages and preserve original PDF page numbers.
Retrieve relevant passages and assemble an evidence-based response.

3 Workflow

The following diagram is synthetic and contains no measured results.

H

4 Evaluation

A real evaluation should specify datasets, metrics and comparison methods.

No experimental values are reported in this demonstration document.

5 Limitations

Retrieval may omit relevant context.

A citation being present does not establish that a claim is correct.

6 Conclusion

Use this document only to exercise the product interaction.
